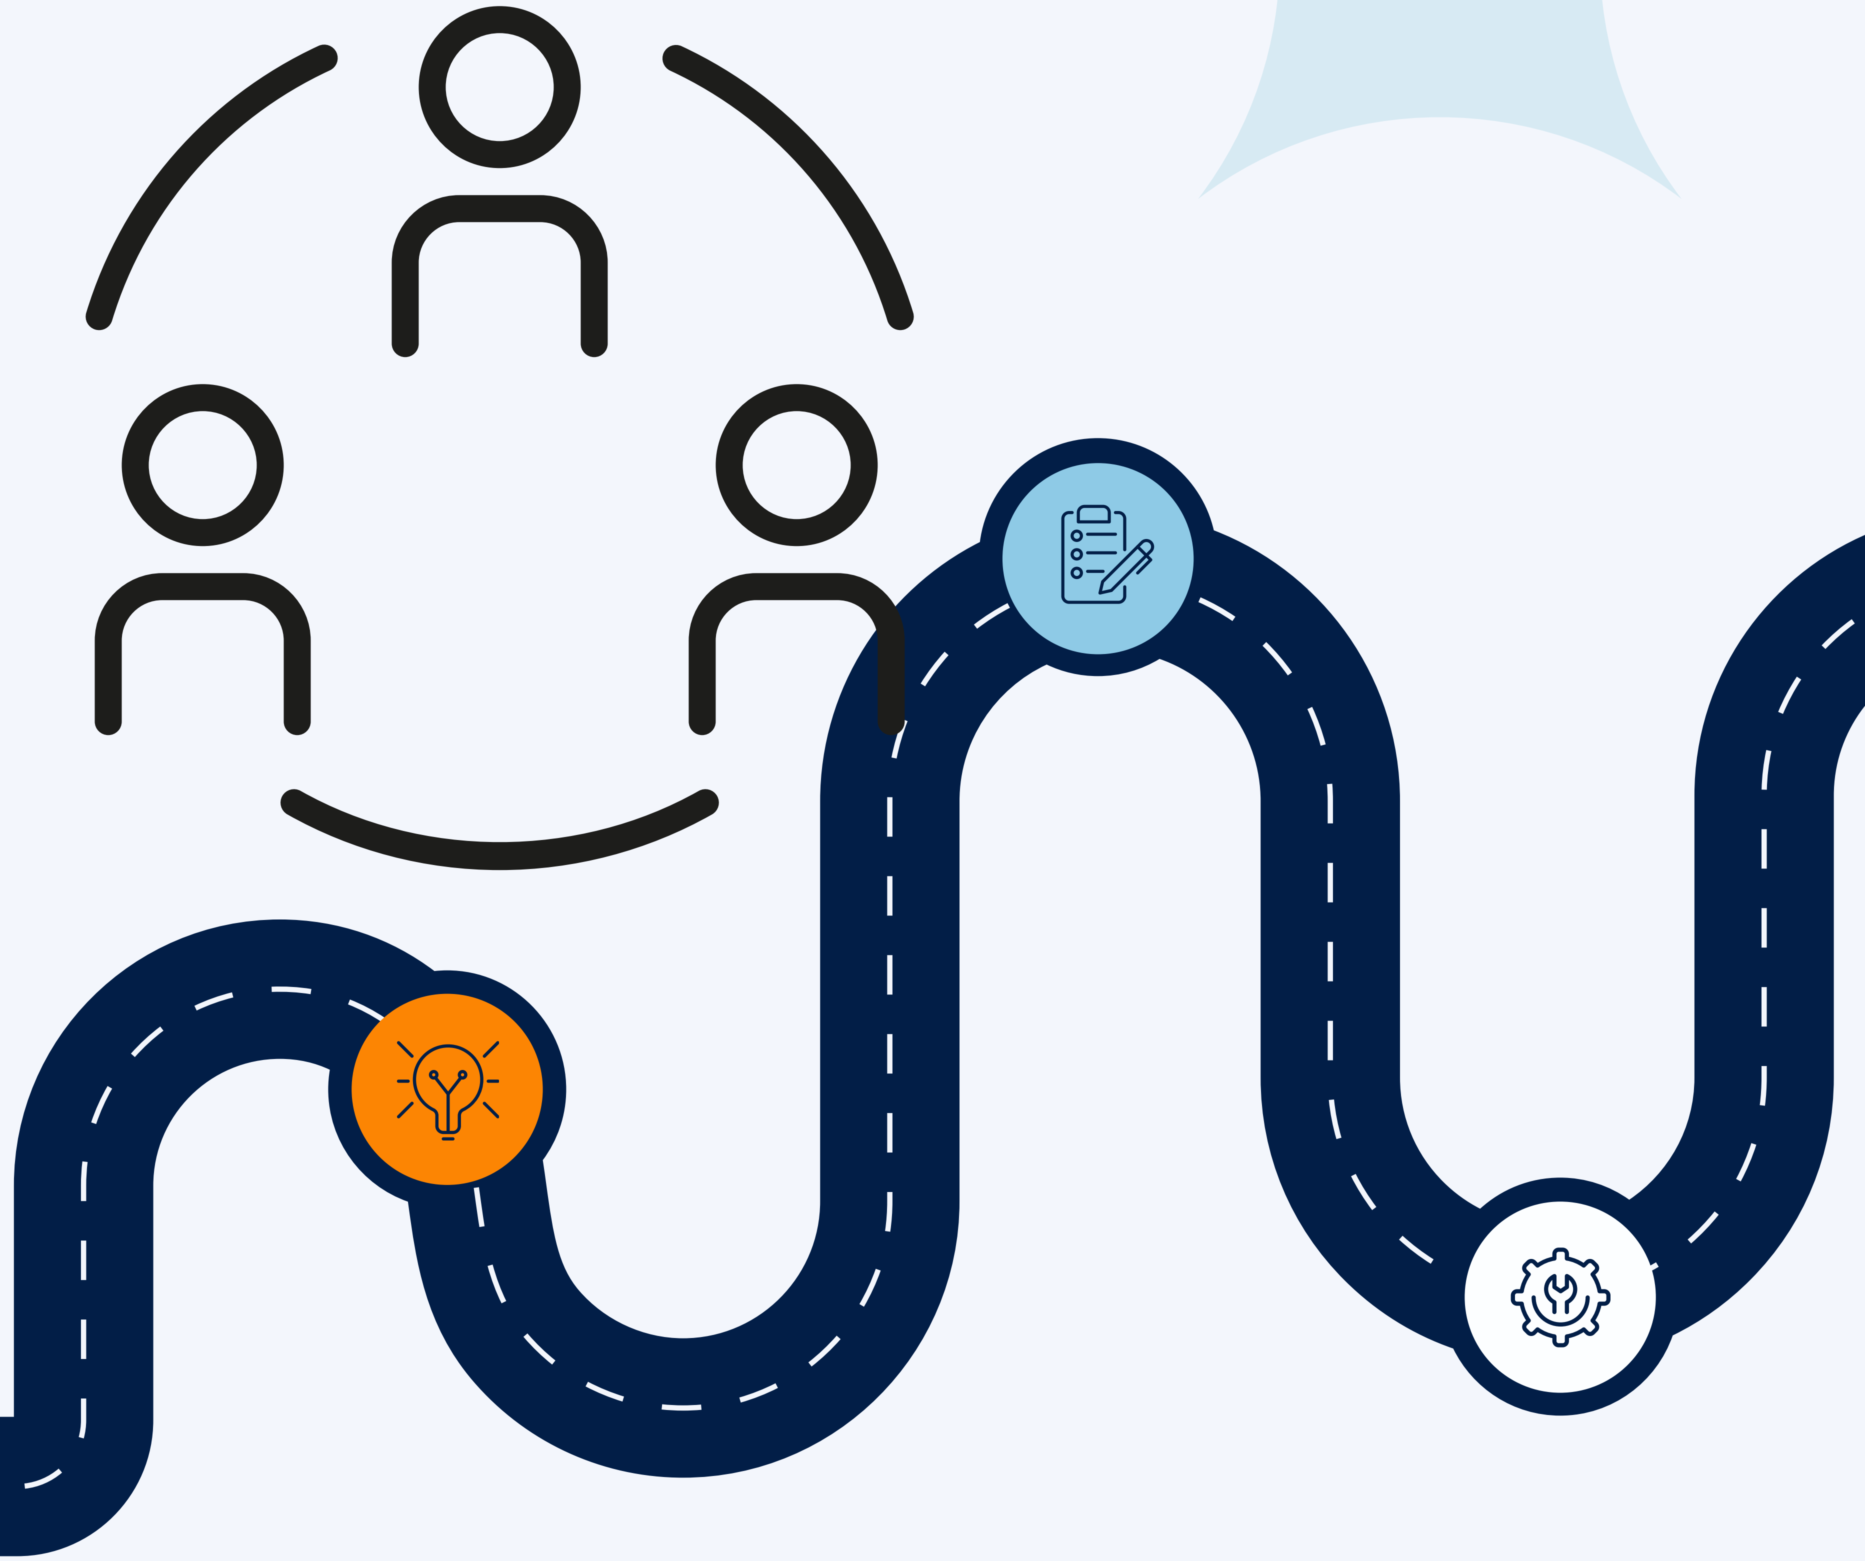
DESIGNING INTEGRATED SOLUTIONS FOR RECOVERY AND GROWTH



CEVI
(A MICROFINANCE NGO)

CEVI
(A MICROFINANCE NGO)

Community Economic Ventures, Inc. (CEVI) was founded in 1998 in Bohol, Philippines. Originally established to support livelihood needs within families covered by the Area Development Program of World Vision Development Foundation (WVDF), CEVI began as a micro-enterprise development initiative aimed at providing dynamic and sustainable projects.

In 2000, CEVI was officially registered as a non-stock, non-profit, non-governmental organization (NGO) with the Securities and Exchange Commission. As a Christian organization, CEVI integrates values formation into its provision of financial and technical assistance, supporting micro-entrepreneurs engaged in trading, manufacturing, agriculture, and service-type businesses.

CEVI's mission is to "serve the economically active poor by providing appropriate and quality microfinance products and services to help their business grow." By offering alternatives to access credit, build up capital, and provide micro-insurance and savings, CEVI extends consultancy services and training through its Credit Plus Education Program, helping transform the lives of thousands of families.

CEVI is an accredited MFI-NGO by the Microfinance NGO Regulatory Council.

Our Vision

People Experiencing Fullness of Life.

Integrated Solutions: A One-Stop-Shop

At the core of its definition, an integrated solution is a system that combines multiple products or services into one comprehensive package designed to solve a broad set of problems. By integrating various solutions, businesses can consolidate their operations, streamline processes, and improve efficiency. Integrated solutions are not just about bundling different services; they provide an orchestrated, cohesive approach that addresses all facets of a problem, delivering a holistic solution.

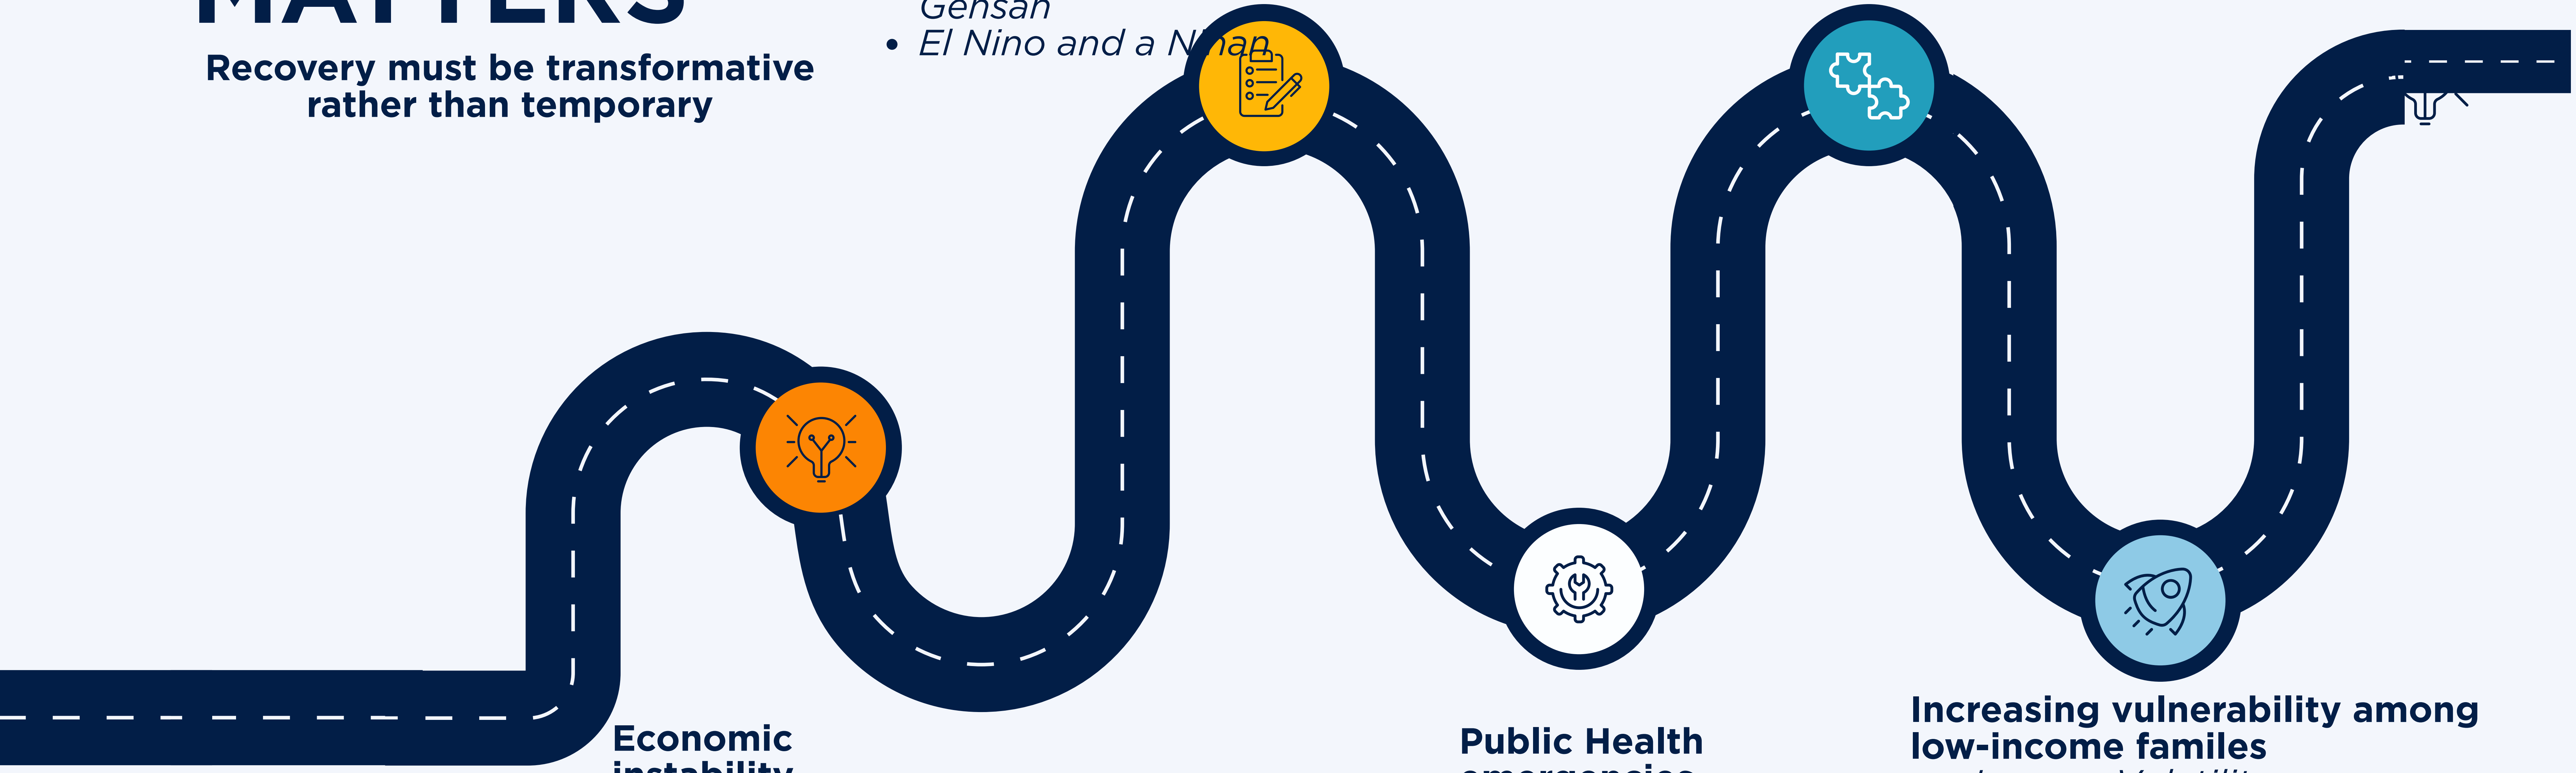
WHY RECOVERY MATTERS

Recovery must be transformative rather than temporary

Climate related disasters eg.Typhoons, earthquakes, landslides and flooding.

- *Typhoon Yolanda, Odette, etc and even Habagat*
- *Landslide in Ormoc*
- *Earthquake: Bohol and the recent Gensan*
- *El Nino and a Ninan*

Inflation and rising costs of living *Middle east energy shocks*



Economic instability

- *weaker peso*
- *domestic political scandals*
- *high foreign debt $147B*

Public Health emergencies eg. COVID19, ASF

Increasing vulnerability among low-income familes

- *Income Volatility*
- *Inflation pressures: rising cost of food, power and transportation*
- *Health and Disaster shocks : absence of buffers*
- *Thin safety nets: access to loan, insurance etc.*

A FUTURE WHERE COMMUNITIES THRIVE

Create inclusive economic opportunities while strengthening community resilience

sustainable livelihood

people meet their current basic needs, recover from crunches and shocks and protect environment

financial security

having enough to cover daily needs , handle emergencies and

resilient local ent.

community based business that withstands economic shocks, natural disasters and crises
